DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9 and 10 of U.S. Patent No. 6655459. Although the conflicting claims are not identical, they are not patentably distinct from each other because independent claims 1 and 6 are substantially identical to independent claims 9 and 10 except for the instant claims call for an isolation member and the claims of 6655459 call for a sleeve. Since the term "isolation member" is considered broader than sleeve, the term 'sleeve' is considered to fully encompass isolation member and it would have been considered obvious to substitute isolation member for sleeve.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3672

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-14, 17, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Bissonnette 4,669,541.

Bissonnette discloses a cement shoe assembly having a housing 12C, 12B disposed on an end of a tubular string 12A. The housing has a first inner diameter 12B and an enlarged inner diameter 12C. Isolation member 18 is disposed in the enlarged end of the housing. Figure 2B shows the valve ports aligned and Figure 2C shows the ports out of alignment. The valve allows flow of fluid through the tool when aligned and prevents flow when misaligned. As to claims 12 and 13, an annular space (near 14) extends substantially the length of the enlarged diameter section. As to claim 14, the space 14 is sealed. As to claim 17, the outer diameter of the housing is uniform. As to claims 19 and 20, the isolation member 18 can be retrieved or it could be drilled in as much as the entire assembly can be retrieved and any member is capable of being drilled. While the isolation member is considered to be retrieved and/or drilled, claims 19 and 20 do not require that the member be retrieved and/or drilled only that the member is capable of being retrieved and drilled. Any member would be considered capable of being retrieved or drilled.

Allowable Subject Matter

Claims 15, 16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
